Correction

On February 26, 1991, a notice appeared in the Official Gazette concerning In Vitro International Inc., an international depositary authority under the terms of the Budapest Treaty on International Recognition of the Deposit of Microorganisms for the Purposes of Patent Procedure. 1123 O.G. 59. The notice quoted a letter from the United States to the World Intellectual Property Organization stating that "it can no longer assure that IVI is able to continue to comply with the requirements of Article 6(2) of the Budapest Treaty with respect to any new deposits." This sentence should have read "with respect to any original deposits." The date of that letter should be March 4, 1991.

Reference Collections of U.S. Patents Available for Public Use in Patent Depository Libraries

The following libraries, designated as Patent Depository Libraries (PDLs), receive current issues of U.S. Patents and maintain collections of earlier-issued patents. The scope of these collections varies from library to libary, ranging from patents of only recent years to all or most of the patents issued since 1790.

These patent collections, which are organized in patent number sequence, are available for use by the public free of charge. Each of the PDLs, in addition, offers supplemental reference publications of the U.S. Patent Classification System, including the *Manual of Classification, Index to the U.S. Patent Classification, Classification Definitions*, and provides technical staff assistance in their use to aid the public, in gaining effctive access to information contained in patents. CASSIS (Classification And Search Support Information System); which provides direct, on-line access to Patent and Trademark Office data, is available at all PDLs. Facilities for making paper copies of patents from either microfilm or paper collections are generally provided for a fee.

Since there are variations in the scope of patent collections among the PDLs and in their hours of service to the public, anyone contemplating use of the patents at a particular library is urged to contact that library, in advance, about its collection and hours in order to avert possible inconvenience.

SECTION 2.—INTERNATIONAL CLASSIFICATION

The short titles associated below with the international class numbers are terms designed merely for quick identification and are not an official part of the international classification. The full names of international classes are given in section 6.1 of the trademark rules of practice.

The designation "U.S. Cl." appearing in this section refers to the U.S. class in effect prior to Sep. 1, 1973 rather than the international class which applies to applications filed on or after that date. For adoption of international classification see notice in the OFFICIAL GAZETTE of Jun. 26, 1973 (911 O.G. TM 210).

SECTION 1.—INTERNATIONAL CLASSIFICATION

The short titles associated below with the international class numbers are terms designed merely for quick identification and are not an official part of the international classification. The full names of international classes are given in section 6.1 of the trademark rules of practice.

The designation "U.S. Cl." appearing in this section refers to the U.S. class in effect prior to Sep. 1, 1973 rather than the international class which applies to applications filed on or after that date. For adoption of international classification see notice in the OFFICIAL GAZETTE of Jun. 26, 1973 (911 O.G. TM 210).

IMPROVEMENTS TO SERVICES

•*Trademark Assignment Processing System (TAPS)*• A new automated TAPS became operational on February 4, 1991. This new automated system was developed to improve the quality of the assignment recordation process and the file integrity of the Assignment search files by eliminating the typing and filing of trademark assignment records in the Assignment Search Room.

Typing of cards for the Assignment search files has been replaced with direct key entry into TRAM. Recordation notices, which had not previously been provided, are now being generated for each trademark assignment document processed and accompany all returned documents. Computer terminals containing the assignment information keyed in TRAM are available for public searching in the Assignment Search Room.

•*New Special PTO Mail Box*• The Correspondence and Mail Division has established a special box, Box DD, to expedite processing of Disclosure Documents. Currently, anyone filing a disclosure document or sending material relating to the program would mail the document/material to the Commissioner Patent and Trademark Office, Washington, D.C. 20231. As a result, the disclosure document would be processed along with the thousands of other pieces of mail sent to the same address.

By establishing Box DD, the Correspondence and Mail Division can readily identify an incoming disclosure document or related information by the unique mailing address on the envelope. The envelope will be sorted from the remainder of the mail and forwarded directly to the Correspondence Branch which handles this program.

When sending disclosure documents to the Patent and Trademark Office, the envelope should be addressed as follows:

Box DD
Commissioner of Patents and Trademarks
Washington, D.C. 20231

Box DD should also be typed/written in the lower left-hand corner of the envelope.

Please remember that only disclosure documents or material related to the disclosure document program should be placed in the envelope addressed to Box DD. Otherwise, processing of the unrelated material may be delayed.

•*Certification Process Review Team*• The Office is conducting a complete review of certification processing with the goal of streamlining operations to better meet customer needs. All of the supervisors and managers in the certification area, as well as employees, are involved.

As part of the review, several meetings with certification custmomers have been held to ensure that customer views are heard and to share the findings and recommendations derived during the certification process review. Customer meetings will continue to be held the third Wednesday of each month. Anyone interested in attending these meetings should contact the Assignment/Certification Services Division at 703-557-1552.

The Certification Process Review Team, along with volunteers from the public user group, are working to develop a form for use in ordering certified copies from the Certification Branch. The form will serve as an easy to use order blank, and will also include definitions of the various types of documents to ensure that the document requested by the customer is provided by the Certification Branch. The form is in draft stage and will be available within a few months.

Until the order form containing definitions of the various types of documents is available, the guidance for requesting certification services is provided in the following Helpful Hints notice under *Certification Services*.

HELPFUL HINTS

•*Trademark Assignments•Review of Recordation Notices*

Since recordation notices are now provided for all trademark assignments being recorded, requestors of assignment recordation services now have the opportunity to ensure that information was properly recorded. Please carefully review each recordation or non-recordation notice. Errors on the recordation notices represent errors in the TAPS. If you should find any errors, please send a request for correction to:

U.S. Patent and Trademark Office
Assignment Branch
CP2-5C14
Washington, D.C. 20231

Assignments with Multiple Properties

When submitting trademark assignments which contain multiple properties, please ensure that the lists of property numbers appear in numeric order with application numbers and registration numbers separated. Lists which are out of numeric order or mix application and registration numbers require additional processing steps and, therefore, slow down the recordation process.

•*Certification Services*•Following is a series of helpful hints that have been developed to date as a result of the meetings with customers and the Certification Process Review Team meetings.

Provide complete information for all requests:

—Service requested (e.g., Certified Copies of *enter type of document requested)*
—Requestor's name or company
—Date of request
—Address of requestor
—Daytime telephone number
—Deposit account or method of payment information
—Address or local PTO Box Number to which copies should be sent
—Complete application number, patent number, or trademark number of document requested (The application number must include the two-digit series code such as 06 or 07 for patent applications and 73 or 74 for trademark applications, and the six-digit serial number).
—Any additional information as might be necessary (see specific types of documents below).

Separate requests for ordering different products

When ordering copies from the Certification Branch, request only one type of service per order to speed processing. Example: a request for a copy of a patent application as filed should be separate from a request for a patent file wrapper and contents.

Ensure authorization to order certified copies of applications as filed

When requesting a certified copy of a patent application as filed, if either the attorney of record has changed since filing or a power to inspect has been filed, please provide a copy of the new power of attorney or the power to inspect. The Certification Branch prepares the bulk of certified copies of applications as filed from microfiche that contains information pertaining to the attorney of record at the time of filing. When a change in attorney of record is made, or when a power to inspect has been filed, this information is not readily available to the Certification Branch unless it is provided with the request.

Limit the number for each expedited order for certified copies of patent application as filed

When submitting requests for expedited certified copies of patent applications as filed, please include no more than three different application numbers on one request. The Certification Branch fills all copies from one request as a complete order. The Office's experience has been that orders which have no more than three application numbers can be filled and delivered most quickly within our five-day service goal; orders with a large number of individual application numbers often result in one or more applications requiring special research or handling which can slow the process. For example, better service can usually be given on five individual orders with three application numbers on each one rather than one order with 15 application numbers on it.

In addition, some customers are using terms such as "rush" or "special" on every order they place; other customers use those terms to identify requests they want to be filled within five days. Please refrain from using the words such as "rush" or "special" and only use the term "expedite" when you have requested and paid for five-day expedited service.

Do not request refunds unless the Office failed to properly fulfill the request.

The Patent and Trademark Office is prohibited from providing refunds to customers except where the fee is paid by actual mistake or in excess, such as a payment not required by law, or in situations where the Office failed to properly fulfill the request. The

Certification Branch, therefore, cannot provide refunds for customers who no longer need a service or for "a mere change of purpose after the payment of money." See 37 CFR 1.26.

Note specific guidance below for each type of document requested.

Patent Applications as Filed

These documents are also frequently called "priority documents" or "foreign priority documents." Please refer to these documents as **Patent Applications as Filed** when requesting certification services.

— 17 Calendar Day Regular Service
— 5 Calendar Day Expedited Service
$10.00 for Regular Service per certified copy
$20.00 for Expedited Serivce per certified copy

Papers supplied are:
Patent application (including specification, claim, abstract (if any))
Any Drawings

If the person requesting the certified copy is not the same as one of the attorney names on the power of attorney originally filed with the application, a power of attorney or power to inspect must be provided for each appliation requested.

If the application as filed being requested is Rule 1.62 file wrapper continuation application, please indicate this on your request. In addition, please provide the parent application number(s) for each Rule 1.62 application.

Uncertified copies of patent applications as filed can also be provided by the Certification Branch. Fulfillment times and costs are the same as for certified copies.

To speed processing, the Certification Branch has instituted a new processing step in the fulfillment of certified copies of patent applications as filed. Within the first day of receipt of these orders, a check is made of the file of microfiche of patent applications as filed. If a microfiche is not available for fulfillment of the order, steps are immediately taken to order the actual file for fulfillment. Certification Branch employees will also call the customer to alert them of the potential for delayed receipt of copies when the microfiche is not available. Therefore, please include a current telephone number on all orders for patent applications as filed. The turnaround time for regular orders (17 days) can normally still be met if the microfiche is missing; the 5-day goal for expedited orders is more difficult to meet when the file must be ordered.

Patent File Wrapper and Contents

These documents are also frequently called "file history," "file history of an application" and "prosecution file." Please refer to these documents as **Patent File Wrapper and Contents** when requesting certification service.
— 25 Calendar Day Service

A power of attorney or power to inspect must be provided for each pending or abandoned file requested unless the power of attorney or power to inspect was submitted with the application and the requestor is listed on that power.

Requests for these documents are provided as follows:

Patent related documents

— 25 Calendar Day Service at $10.00 per document

Trademark related documents

— 25 Calendar Day Service at $0.30 per page and $3.50 per certificate

Request for these types of services must identify the specific document or portion of the document requested.

In the past, certified copies of the Manual of Patent Examining Procedures have been provided by the Office of the Assistant Commissioner for Patents. The Certification Branch currently maintains a collection of the various editions and revisions of the Manual of Patent Examining Procedures (MPEP) on microfilm reels. Members of the public may request certified copies of chapters or sections of the various editions and revisions of the MPEP directly from the Certification Branch.

For the purpose of assessing fees, each chapter of the MPEP is considered to be one document. The fee for certification service is $10.00 for each chapter, or portion of a chapter ordered. The same chapter of two editions, or two revisions of the same chapter within the same edition, would be considered as two documents for fee accounting purposes. Examples: (1) A customer requests a certified copy of Chapter 100 from the 3rd Edition, Revision 2. The charge would be $10.00. (2) A customer requests a certified copy of Chapter 100, Section 100.1 from the original 2nd Edition. The charge would be $10.00. (3) A customer requests a certified copy of Chapter 100 from the 2nd Edition, Revision 1 and Chapter 200 from the original 3rd Edition. The charge would be $20.00.

Requests for certified copies of the MPEP may be sent via United States mail addressed to:

Commissioner of Patents and Trademarks
Box 10
Washington, D.C. 20231

or may be hand carried and placed at the Finance Cashier's Window or Public Service Window.

Requests must inlcude the Edition and Revision number from which the copy should be produced and specify the Chapter(s) or portions of the chapter(s) desired.

Customers may either request that their copies be mailed to a mailing address or be delivered to a Public Service Window box.

The turnaround time from receipt of the order at the Patent and Trademark Office to mailing of the certified copy is five working days.

Reference Collections of U.S. Patents Available for Public Use in Patent Depository Libraries

The following libraries, designated as Patent Depository Libraries (PDLs), receive current issues of U.S. Patents and maintain collections of earlier-issued patents. The scope of these collections varies from library to libary, ranging from patents of only recent years to all or most of the patents issued since 1790.

These patent collections, which are organized in patent number sequence, are available for use by the public free of charge. Each of the PDLs, in addition, offers supplemental reference publications of the U.S. Patent Classification System, including the *Manual of Classification, Index to the U.S. Patent Classification, Classification Definitions*, and provides technical staff assistance in their use to aid the public, in gaining effctive access to information contained in patents. CASSIS (Classification And Search Support Information System); which provides direct, on-line access to Patent and Trademark Office data, is available at all PDLs. Facilities for making paper copies of patents from either microfilm or paper collections are generally provided for a fee.

Since there are variations in the scope of patent collections among the PDLs and in their hours of service to the public, anyone contemplating use of the patents at a particular library is urged to contact that library, in advance, about its collection and hours in order to avert possible inconvenience.

Applications for the registration of marks in more than one class have been filed as provided in section 30 of said act as amended by Public Law 772, 87th Congress, approved Oct. 9, 1962, 76 Stat. 769. SECTION 1.—INTERNATIONAL CLASSIFICATION

The short titles associated below with the international class numbers are terms designed merely for quick identification and are not an official part of the international classification. The full names of international classes are given in section 6.1 of the trademark rules of practice.

The designation "U.S. Cl." appearing in this section refers to the U.S. class in effect prior to Sep. 1, 1973 rather than the international class which applies to applications filed on or after that date. For adoption of international classification see notice in the OFFICIAL GAZETTE of Jun. 26, 1973 (911 O.G. TM 210).

SECTION 1.—INTERNATIONAL CLASSIFICATION

The short titles associated below with the international class numbers are terms designed merely for quick identification and are not an official part of the international classification. The full names of international classes are given in section 6.1 of the trademark rules of practice.

The designation "U.S. Cl." appearing in this section refers to the U.S. class in effect prior to Sep. 1, 1973 rather than the international class which applies to applications filed on or after that date. For adoption of international classification see notice in the OFFICIAL GAZETTE of Jun. 26, 1973 (911 O.G. TM 210).

Reference Collections of U.S. Patents Available for Public Use in Patent Depository Libraries

The following libraries, designated as Patent Depository Libraries (PDLs), receive current issues of U.S. Patents and maintain collections of earlier-issued patents. The scope of these collections varies from library to libary, ranging from patents of only recent years to all or most of the patents issued since 1790.

These patent collections, which are organized in patent number sequence, are available for use by the public free of charge. Each of the PDLs, in addition, offers supplemental reference publications of the U.S. Patent Classification System, including the *Manual of Classification, Index to the U.S. Patent Classification, Classification Definitions*, and provides technical staff assistance in their use to aid the public, in gaining effctive access to information contained in patents. CASSIS (Classification And Search Support Information System); which provides direct, on-line access to Patent and Trademark Office data, is available at all PDLs. Facilities for making paper copies of patents from either microfilm or paper collections are generally provided for a fee.

Since there are variations in the scope of patent collections among the PDLs and in their hours of service to the public, anyone contemplating use of the patents at a particular library is urged to contact that library, in advance, about its collection and hours in order to avert possible inconvenience.

SECTION 2.—INTERNATIONAL CLASSIFICATION

The short titles associated below with the international class numbers are terms designed merely for quick identification and are not an official part of the international classification. The full names of international classes are given in section 6.1 of the trademark rules of practice.

The designation "U.S. Cl." appearing in this section refers to the U.S. class in effect prior to Sep. 1, 1973 rather than the international class which applies to applications filed on or after that date. For adoption of international classification see notice in the OFFICIAL GAZETTE of Jun. 26, 1973 (911 O.G. TM 210).
